## DECISIVE ENGAGEMENT

#### Battle of the Four Rivers Continues a "Draw."

Geneva special: It is stated here that Emperor William is ill with in flammation of the lungs, the result of his falling into a trench filled with

Paris special: The Germans, with unprecedented violence, attacked all along the battle line Sunday in probably a final effort to save the army of General Von Kluck and prevent a general withdrawal from France. There can he no doubt that the kaiser, disturbed by delay, commanded such a furlous widespread attack as might shatter the allied line and open the way to Paris. But Berlin Is again disappointed.

The mighty strake, launched with credible fury, failed as It falled on past support public aptimism. days. The Germans are once more in their trenches, after giving ground slightly between the Olse and the They jost prisoners, flags and guns and the spirit of the ailled troops is as unbroken as their ranks.

At the center, near Rheims, the Germans launched a determined blow at the allies, but were thrown back near the fort of Nogent L'Abbesse. Far ther eastward, toward the Argonne. they gained ground, but were obliged to surrender it. Along the Meuse their position improved, but they have not broken through the barrier of Verdun-Toul-Nancy. There have been no decisive engagements in Lorraine, Alsace, or the Vosges.

## Never Such a Battle.

The latest government report contains the assurance that the ailles' flanking movement is vigorous in spite of increased German resistance, and that the severest lighting is now with the bayonet. Germans and allies have been struggling back and forth over the same ground and the loss of life ls frightful. The ailles' center holds, while the right strives to clinch vietory. Adequate understanding of the battle of the Aisne, now in its diffeent! day, is impossible. One is bankrupt of superlatives. Such endurance, valor seen on any field of battle. Comhats of greater violence than Austerlitz or Lelnzle are incidents of this drastle struggle. The most reassuring news received from the front is that the allies have not been forced to abandon the great tlanking movement designed to envelop the German right wing or compel its rapid retreat. Sunday and Saturday, while the artillery of each side was operated incessantly, allles and tiermans met between the trenches in face to face fighting There have been a succession of bay onet charges. Trenches a few hundred yards apart were taken and retaken and the loss of life was stas-

## Peril of German Situation.

From government reports and milltary opinion, it is certain that the ai les have not relaxed their determines flanking movement and that the danger of the German armies is greater than ever. The fact that they have tried desperately to keep in motion an offensive movement all along the time indicates to critics itere the periof their situation.

There is undoubtedly a large in dependent force of English and French striking at German communications with Beigium. Cavalry from this army is raiding railroad ilnes and selzing supply trains. A column from the extreme left of the allies is swinging slawly around the massed German right, attempting a stroke at towns quarding communications, but unable to press au offensive until the weight of the flanking force tolis more heav-

## Twenty Against 200.

La Liberte of Parls relates an inclent on the battlefield at Complegne in which a French lieutenant and nineteen cnirassiers attacked 200 drugoons of the German imperini gnard and dashed right through them. They continned the fight in the streets of Remy and finnily reached Paris after a series of hairbreath escapes. Three of the nineteen were killed, and five were made prisoners. The others passed through the German lines in disgnise.

The party had dismounted at a farm outside Remy at 10 o'clock at night when they were cut off by a squadron of the imperial guard. The lientenant consulted his men, and all agreed to try to brenk through the enemy. The guard gave way before their impetaons cries, and the fight was continued in the streets of Remy, where thirty of the enemy were siain.

Teach them by thy spirit that hetred and violence are not strength, but wenkness; that the true safeguarding of a nation is not to be found in weapons of war, but in those eternal principles which war, but in those eternal principles which maks for righteousness and truth and brotherhood and pesce. Give to those who shall suffer in the war which is raging now the consolutions of thy grace. Heal the sick, comfort the wounded, minister to the dying and bind up the broken heart. We ask it in the name of Jesus Christ, our Lord.

Have mercy. O Lord, upon all the wounded and the suffering. Let thy grace be their comfort, although natural friends be far away. Raise them to health if it be good, but chiefly give them such faith and patience that they may glorify thee upon earth and, escaping safe from the assaults of Satun, may rest in peace and rise to partake of thy glory, through Je-me Christ our Lord

With our blood, if it must be, quench the free of intred forever. Let a new love he born a love never wet known on the he born, a love never yet known on the earth—the great love of a people for a people, of strung nation for strong ne-tion, the chivalry of the strong to the weak, the irust of the week in the strong. Give peace in our time, O God. Give peace in our time, O God. May our prayers go up before thee continually until they become one voice, the voice of all nations. O Father of mankind, have mercy upon us for thy mercy's sake. Amen

#### "Before Thee In Shame."

From the Christian World Pulpit: Father of mankind, in whose hands is the destiny of men and nations, we bow before thee in shame and humiliation that the passions, the follies, the blindness, the wickedness, of men should strike athwart

thy purpose that thy kingdom should come and thy will he done in earth as in heaven. We beseech thee in thine infinits mercy to shorten the agony of the nations in deadly strife. Soon may the sword be sheathed, and may the hands the, are lifted against each other in war soon clasp each other in lasting friendship. Out of the encircling gloom of war may thy light shine, and may men see more clearly than

shine, and that men see more clearly than ever hefore that in thy peace and thins obedience is the weal of the nations as well as the rest of the soul.

We implore thee on behalf of the men in the field, of all the nations engaged in strife. Even while they are bravely doing their duty to their countries may they remember that they are Christian men and that the honor of their religion as well as of their country is in their keepwell as of their country is in their keeping. May those who fall in the field fall
as men whose quenchless faith is in the
"Captain of their salvation." For those
who are wounded we pray that kind hearts
and gentle and skiliful hands may minister to them and soon restore them to
health and strength. health und strength.

#### The Divine Injunction.

We would pray for all who are taken prisoners that they may be kept end treated by captors who will remember him who bade us love our enemies, and

may the captors treat the captives as they themselves wish to be treated. For those whose hearts will bleed and For those whose hearts will bleed snu whose homes will be shadowed by the loss of loved ones, most merciful Father, ws would especially hour out our fervent petitions. In their sorrow may they feel that the compassionate Saviour is very near and very dear to them, and may their greatest comfort be in him who said, "I

am the Resurrection and the Life; be-cause I live ye shall live also." Grant, O Heavenly Father, all wisdom to our rulers and governors, that they may wage war with the desire to effect a speedy and a lasting peace, when those who are now our enemies shall be sgain our friends, and may this war be the last between nations who call themselves between nations who call themselves Christian and who are all members of the one great family of the common Father.
We would offer a last petition for those who in our own and other countries are called upon to suffer hardship through the interruption of peaceful industry. Grant them the grace of patience. Open the hearts and the hands of the stewards of thy wealth that they may help to the utmost of their power their less fortunate brothers and sisters. May our nation at this time be a united family, cheerfully bearing one another's burdens, and so fulfilling the law of Christ.

We ask all in his name and for his sake

## "Break Thou the Spell."

Walter Rauschenbusch, In prayers of the Social Awakeuing:

O Lord, since first the blood of cried to thee from the ground that drank it this earth of thine has been defiled with the blood of man shed by his brother's hand, and the centuries sob with the censeless horror of war. Ever the pride of kings and the covetousness of the strong has driven peaceful nations to staughter. Ever the songs of the past and the pomp of armies have been used to Inflame the passions of the people. Our spirit cries out to thee in revolt against it, and we know that our right-eous anger is answered by thy holy wrath.

Break thou the spell of the enchent-ments that make the nations drunk with the lust of battle and draw them on as willing tools of death. Grant us a quiet and steadfast mind when our own ne-tion clamors for vengeance or aggression. Strengthen our sense of justice and our regard for the equal worth of other pe ples and races. Grant to the rulers of nations faith in the possibility of peace through justice and grant to the comm people a new and stern enthusiasm for the cause of peace. Bless our soldiers end sallors for their swift obedience end their willingness to answer to the call of duty, but inspire them none the less with a hatred of war, and may they never for love of private glory or edvancement pro-voke its coming. May our young men still rejoice to die for their country with the valor of their fathers, but teach our ege nobler methods of matching our strength and more effective ways of giv-

ing our life for the flag.

O thou strong Father of all nations, draw all thy great family together with an increasing sense of our common blood and destiny, that peace may come on earth at last and thy sun may shed its light rejoicing on a holy brotherhood of peoples

#### KITCHEN SINKS.

They Are Low Yet Because They Hed to Be Low Originally.

In a recent Issue of the Survey the question why kitchen sinks have been made so low was discussed. No one seemed able to explain. Finally a certain maker discovered that the original sinks were made when the washing of dishes and other sink work was done in wooden tubs with high sides. Such a tub when used in a high sink came up too far, so the sink was made iow. Furthermore, as running water and fixed fnucets had not long been made, the tub had to be lifted out of the sink and the lower the sluk the lighter the lift.

Through Improvements in faucets dishpans and other accessories of kitchen sinks have been made no one has seemed to realize that the sink could be improved by raising. women were—and are—compelled to endure discomfort when doing their ordinary household work.

#### A BILLION DOLLARS.

The Time It Would Take on Expert to Count Tham Singly.

I wonder if we realize when we talk of a billion dallars what an enormous sum of mouey it means?

We all know how rapidly an expert counter of coins will manipulate them. You can scarcely follow the motion of his fingers as he shifts the colus from one pile to another and counts them. The treasury experts will count 4,000 silver dollars in un hour and keep it up all day long, but that is their limit.

Working eight hours a day, then, un expert counter of coins will count 32,-000 silver dollars in a day, but how long will it take him at that rate to count \$1,000,000? Thirty-one days.

But that is only the beginning of the measurements of great figures, for if this same man were to go on counting on continental missions. silver dollars at the same rate of speed for ten years he would find that he had only counted 100,000,000 of them and that to count \$1,000,000,000 would require 102 years of steady work at the rate of eight hours a day during every
working day of every one of the 102

A writer in Popular Mechanies declares that in this and many Other respects the expedition is better equipped with modern devices than any previous body of polar explorers has ever leen.

Details of food supply, shelter and provisions for the general health and comfort of the members of the party have been worked out with scientific rare, lested in the snowfields of northern Norway and pronounced perfect.

Five motor sledges will be taken. One of these has a tifty-five horselow er gasoline englue, another a forty horsepower. These two have air 100 peliers, but for use against head winds they are also equipped with positive drive mechanism in the form of toothed drinns attached at the rear to engage the lee and snow. In the extremely low temperatures of the antnrette the snow becomes as loose as dry sand, so these sledges are mounted corded in the Breckenridge County on flat, skillke runners to prevent them from stalling.

## RUMORS OF WAR

At that time were rumors out that war would be declared of Germany's ultimatum would not be accepted by England, France and Russia. We left Berlin on point, to visit my mother and sister. They were at the depot and received us and our joy was mutual. Though mother is 89 years old, she is so well preserved that she looks more like a woman of 60. While we were at Koenigsberg, war was proclaimed and martial law followed at once. My possport from 1885 I had with me, was not considered, and the Consulrefused to issue me a new one, and without a pass it was dangerons to walk the streets. After threatening the Consul I would wire to Washington, and, showing him my certificate of the Mic sonic lodge and a Shriner degree, he finally gave me a pass. We remained in our room several days watching the passing of the infantry, cavalry and artilery. The noise day and night was enough to make any man nervous. We were held up several times by the police to show our pass and came very near be ing arrested at one time as English

We left by the first opportunity we got for a train and returned to Berlin. In ordinary times it takes eight hours to get to Berlin from Koenigsberg, but our train took 32 hours

## Called Session of Fiscal Court

The Fiscal Court met in called ession last week to take up the matter of an iron bridge across Rough Creek at Tate's Mill. The old bridge was condemned and a new iron pridge ordered built in its place.

The Fiscal Court also ordered that the Court House be repaired. In regard to school books for destitute children it was found that the old law only allowed \$100 to be appropriated for this pur pose and that the same was still in effect. Judge Dowell and School Superintendent J. W. Trent were appointed a committee to see that this amount of money be made to reach as far as possible in purchasing books. There were applications on hand for over \$1000 worth of books from the 104 school districts.
